DANNY CECCATTINI

SOFTWARE DEVELOPER

0409 203 894 | Email | LinkedIn | GitHub | Portfolio

I love building and creating all things virtual and physical. My curiosity and drive for trying new things encourages me to make mistakes, deconstruct, analyse, abstract, and build again. It is these aspects that helped me thrive during my time as an aspiring academic, a project manager in construction and engineering, and as a hobbyist mechanical watchmaker and arduino builder.

One of the most essential attributes for a Software Developer is the passion for abstraction. It is this passion that reminds of the modesty and limits of my own knowledge and that there will always be endless knowledge to consume. This endless process of growth could not make me happier. The learning never ends!

SKILL SET

Front End
- HTML | CSS | JavaScript
- React.js | Vue.js
- jQuery | underscore
- Bootstrap | SCSS
- Gatsby

Back End
- Ruby on Rails | Node.js
- PostgreSQL | MongoDB
- Sinatra

Other
- GitHub
- RSpec
- Meteor
- Test-Driven-Development
- Gatsby | Sinatra
- Basic Python
- C for Arduino
- Linux OS and CLI
- Experience in construction project management

EDUCATION

General Assembly, Sydney - *Web Development Immersive*

DEC 2018 - MAR 2019
